

## Ordering Guide

### BS Fuse Switches with Reclosure Preventers

Hubbell offer a unique device to mechanically interlock a UFS Fuse Switch to a Hi-Tech UCA Contactor. The function of this device is to allow the fuse switch to be opened in the case of a contactor welding but then prevent the fuse switch from closing until the contactor is open.

Fuse Switch UFS No.	Fuse Switch Catalogue No.		Fuse Switch Reclosure Preventor Mechanism Catalogue No.
	3 Pole	4 Pole	
UFS 32A1	62303-3	62281-3	62037-2
